FIG.10

This diagram shows the front side of the device. It features a main body with a central opening. On the left side, there are two large, curved components labeled 1A and 1B. A horizontal bar or handle is labeled 2A. Below it, another component is labeled 2B. At the bottom left, there is a small, rectangular component labeled 4. To its right, a larger, more complex assembly is labeled 5. In the center, there is a circular component labeled 6. To the right of the circular component, there is a vertical rod or pin labeled 7. At the top right, there is a small, rectangular component labeled 8. The entire device is mounted on a base labeled S.
